

# WANT FASTER, GREENER BLACKTOP?

**Welcome to the age of green or guilty.** And one of the challenges of this big, black business of asphalt is: How green can we really be? Well, here's a big, green surprise for you. And for your bottom line. Get greener repair with EZ Street Asphalt. Any greener, and we'd be tearing up roads and putting down sod.

**Why is the EZ Street product greener than garden variety asphalt?** Simple. It's faster and easier, using fewer resources and eliminating waste. It also cuts costs big time.

**Grandpa did not go green.** And asphalt hasn't changed much since his time. Send guys with a load of quick & dirty product to make a temporary patch. Later, more guys with a load of hot mix make a permanent repair. Got leftovers? It's garbage. This is waste and a King Kong carbon footprint.

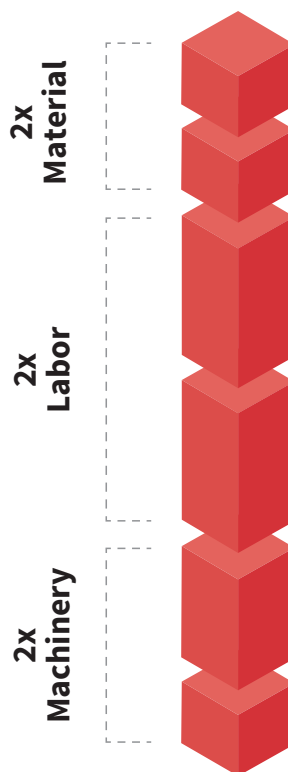

**Get faster, go greener.** EZ Street Asphalt is just as quick as a lean crew doing throw & go—and it's guaranteed permanent. Less material and equipment. Fewer crew members and fewer closed roads. And any leftover material goes back in the stockpile. Your stockpile. EZ Street Asphalt lives in your yard, always ready to work. No waiting in line at a hot-mix plant. Talk about saving fuel and finances. No lines, fewer trucks, fewer crew members, and less material for just one repair? In the long run, you'll save about 50%.

**Going green also goes to your head.** Your crews spend less time on repairs. Less time exposed to traffic. Fewer closed roads. Lower liability. Fewer headaches. And...fewer people trying to dump out a front loader full of guilt. You become an asphalt hero. How good is that going to feel?

**Want to know more about going green while showing potholes who's boss?**

*There's a free sample of EZ Street Asphalt with your name on it. Just call the number below.*

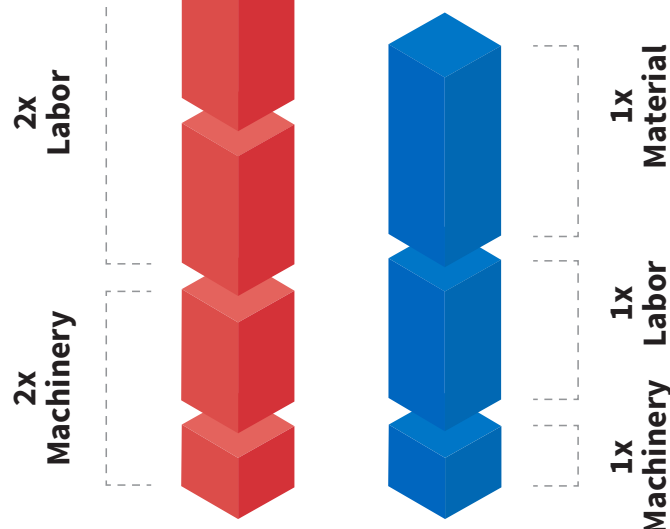

## COST

**Temporary  
Cold Mix &  
Hot Asphalt  
Patch**

EZ Street Asphalt saves time and money because work crews don't have to return to replace a temporary patch.

## COST

*Costs represented here are an example only and may not represent your own structure.*

## GUARANTEED PERMANENT • WORKS IN WATER
